Indian Bank gets ISO 27001:2013 Certificate

Indian Bank, Chennai based Public Sector Bank gets the prestigious ISO 27001:2013 Certificate from the British Standard's Institution (BSI), an international certification agency for its Technology Management Department and Information Security Cell establishing that its various departments, namely, Data Centre, Core Banking Solution Project Office, Disaster Recovery Centre , Corporate Office IT Department and Information Security Cell have complied with the international standards for security capabilities relating to processes, policies, practices and infrastructure.

Speaking on this achievement, Shri TM Bhasin, MD and CEO of Indian Bank said that "getting ISO certification is a milestone in achieving the information security objective of the Bank to have system and processes for business sensitive, efficient, effective and robust IT security environment. This achievement also demonstrates the commitment of the Bank to provide safe and sound services to all the constituents and reducing operational risk. He also said that with the state of the art technology, Indian Bank is able to provide hassle free services to its customers across the country through 24x7 internet banking, 2411 Branches and 2336 ATMs.

 This distinction is achieved by only a few banks in the country. Deloitte Touché Tohmatsu India Private Limited provided consultancy services to Indian Bank to achieve ISO 27001:2013 certification.

ISO develops and publishes standards that establish best practices across various industries, including banking. The ISO 27001:2013 is the latest standard and a certification in that is an endorsement of the Bank's achieving its commitment to protect and safeguard the critical information in order to ensure secure banking operations by building the processes complying with the highest International standards.
