# Basel III- Pillar III Disclosures

---

September 30, 2024

---

**ADDITIONAL DISCLOSURES IN TERMS OF COMPLIANCE OF BASEL III REQUIREMENTS AS STIPULATED BY RBI**

**Table DF – 1**

**Scope of Application**

**Name of the head of the banking group to which the framework applies: *Indian Bank***

**(i) Qualitative Disclosures:**

**a. List of group entities considered for consolidation**

Name of the entity / Country of incorporation	Whether the entity is included under accounting scope of consolidation (yes / no )	Explain the method of consolidation	Whether the entity is included under regulatory scope of consolidation (yes / no)	Explain the method of consolidation	Explain the reasons for difference in the method of consolidation	Explain the reasons if consolidated under only one of the scopes of consolidation
IndBank Merchant Banking Services Ltd. (Subsidiary)	<b>Yes</b>	Consolidated in accordance with Accounting Standard 21- Consolidated Financial Statements	<b>Yes</b>	Consolidated in accordance with Accounting Standard 21- Consolidated Financial Statements	<b>Not Applicable</b>	<b>Not Applicable</b>
Ind Bank Housing Ltd (Subsidiary)	<b>Yes</b>	Consolidated in accordance with Accounting Standard 21- Consolidated Financial Statements	<b>Yes</b>	Consolidated in accordance with Accounting Standard 21- Consolidated Financial Statements	<b>Not Applicable</b>	<b>Not Applicable</b>
Indbank Global Support Services Ltd (Subsidiary)	<b>Yes</b>	Consolidated in accordance with Accounting Standard 21- Consolidated Financial Statements	<b>No</b>	Not Applicable	<b>Not Applicable</b>	<b>Regulatory Guidelines</b>
Asrec (India) Ltd (Joint venture)	<b>Yes</b>	Accounting standard 27-Financial reporting of interests in joint ventures	<b>Yes</b>	Consolidated in accordance with proportionate consolidation method as per Accounting Standard 27- Financial reporting of interests in joint ventures	<b>Not Applicable</b>	<b>Not Applicable</b>

Name of the entity / Country of incorporation	Whether the entity is included under accounting scope of consolidation (yes / no )	Explain the method of consolidation	Whether the entity is included under regulatory scope of consolidation (yes / no)	Explain the method of consolidation	Explain the reasons for difference in the method of consolidation	Explain the reasons if consolidated under only one of the scopes of consolidation
Universal Sampo General Insurance company Ltd (Joint venture)	<b>Yes</b>	Accounting standard 27-Financial reporting of interests in joint ventures	<b>No</b>	Not Applicable	<b>Not Applicable</b>	<b>Regulatory Guidelines</b>
Tamil Nadu Grama Bank (Associates)	<b>Yes</b>	Consolidated under Equity Method in accordance with Accounting Standard 23- Accounting for Investments in Associates in Consolidated Financial Statements	<b>No</b>	<b>Not Applicable</b>	<b>Treated as associates</b>	Risk weighted for capital adequacy purposes
Saptagiri Grameena Bank (Associates)	<b>Yes</b>	Consolidated under Equity Method in accordance with Accounting Standard 23- Accounting for Investments in Associates in Consolidated Financial Statements	<b>No</b>	<b>Not Applicable</b>	<b>Treated as associates</b>	Risk weighted for capital adequacy purposes
Puduvai Bharathiar Grama Bank (Associates)	<b>Yes</b>	Consolidated under Equity Method in accordance with Accounting Standard 23- Accounting for Investments in Associates in Consolidated Financial Statements	<b>No</b>	<b>Not Applicable</b>	<b>Treated as associates</b>	Risk weighted for capital adequacy purposes

**b. List of group entities not considered for consolidation both under the accounting and regulatory scope of consolidation:**

Name of the entity / country of incorporation	Principal activity of the entity	Total balance sheet equity (as stated in the accounting balance sheet of the legal entity)	% of bank's holding in the total equity	Regulatory treatment of bank's investments in the capital instruments of the entity	Total balance sheet assets (as stated in the accounting balance sheet of the legal entity)
<b>NIL</b>					

**(ii) Quantitative Disclosures:**

**c. List of group entities considered for consolidation:** (₹ in million)

Name of the entity / country of incorporation (as indicated in (i)a. above)	Principal activity of the entity	Total balance sheet equity (as stated in the accounting balance sheet of the legal entity)	Total balance sheet assets (as stated in the accounting balance sheet of the legal entity)
IndBank Merchant Banking Services Ltd (India)	Merchant Banking services	443.79	1348.32
Ind Bank Housing Ltd (India)	Housing Finance	100.00	87.31
Indbank Global Support Services Ltd	Operational Support Services Company	100.00	126.44
Asrec India Ltd (India)	Asset Recovery Company	980.00	2690.88
Universal Sompo General Insurance company Ltd (India)	General insurance company	3681.82	63247.20

**d. The aggregate amount of capital deficiencies in all subsidiaries which are not included in the regulatory scope of consolidation i.e. that are deducted:**

Name of the subsidiaries / country of incorporation	Principal activity of the entity	Total balance sheet equity (as stated in the accounting balance sheet of the legal entity)	% of bank's holding in the total equity	Capital deficiencies
<b>NIL</b>				

**e. The aggregate amounts (e.g. current book value) of the bank's total interests in insurance entities, which are risk-weighted:**

Name of the insurance entities / country of incorporation	Principal activity of the entity	Total balance sheet equity (as stated in the accounting balance sheet of the legal entity)	% of bank's holding in the total equity / proportion of voting power	Quantitative impact on regulatory capital of using risk weighting method versus using the full deduction method
<b>NIL</b>				

**f. Any restrictions or impediments on transfer of funds or regulatory capital with in the banking group:**

There is no restriction or impediments on transfer of funds or regulatory capital within the banking group.

## Table DF – 2: Capital Adequacy

### Assessment of Capital Adequacy:

(a) Bank maintains capital to protect the interest of depositors, general creditors and stake holders against any unforeseen losses.

As per the RBI guidelines, Banks have to maintain a Minimum Common Equity Tier 1 (CET 1) of 8.00% (including Capital Conservation Buffer of 2.50%) and minimum CRAR of 11.50% (including Capital Conservation Buffer of 2.50%) effective from 1st October 2021.

(b) In line with RBI guidelines, Bank has adopted following risk management approaches for assessing the capital adequacy:

- **Credit Risk:** Standardised Approach
- **Market Risk:** Standardised Duration Approach
- **Operational Risk:** Basic Indicator Approach

(c) Bank projects capital for the next 5 financial years based on business projections, policy guidelines, macro-economic scenarios, risk appetite etc

(d) Under Pillar II, Bank considers following risks while assessing / planning capital:

<ul style="list-style-type: none"> <li>▪ Credit Concentration Risk</li> <li>▪ Interest Rate Risk in the Banking Book</li> <li>▪ Liquidity Risk</li> <li>▪ Settlement Risk</li> <li>▪ Compliance Risk</li> <li>▪ Reputational Risk</li> <li>▪ Model Risk</li> <li>▪ Country Risk</li> <li>▪ Compensation Risk</li> <li>▪ Legal Risk</li> <li>▪ Group Risk</li> <li>▪ Conduct Risk</li> <li>▪ Risk of Securitisation</li> <li>▪ Stress Credit Risk</li> </ul>	<ul style="list-style-type: none"> <li>▪ Underestimation of Credit Risk under Standardised Approach</li> <li>▪ Superannuation Obligation Risk</li> <li>▪ Off-Balance sheet exposure Risk</li> <li>▪ Information Security Risk</li> <li>▪ Outsourcing Risk</li> <li>▪ Human Resources Risk</li> <li>▪ Residual Risk</li> <li>▪ Strategic Risk</li> <li>▪ Un-hedged Foreign Currency Exposure Risk</li> <li>▪ Climate Risk</li> <li>▪ Cyber Risk</li> <li>▪ Deposit Concentration Risk</li> <li>▪ Interest Rate Risk in Trading Book</li> <li>▪ Emerging Risk</li> </ul>
---	--

(e) Bank also periodically undertakes stress testing in various risk areas to assess the impact of stressed scenario or plausible events on asset quality, liquidity, interest rate, derivatives and forex on its profitability and capital adequacy.

A comprehensive stress testing framework is put in place. Bank conducts stress test on quarterly basis based on scenarios prescribed by RBI as well as bank specific scenarios including Macroeconomic Indicators and Micro Segments.

## Quantitative disclosures (as per Basel III guidelines)

(a) Capital requirements for credit risk: (₹ in Million)

Particulars	Standalone	Consolidated
Portfolios subject to standardized approach	3,91,685.18	3,92,317.82
Securitization exposures	--	--

(b) Capital requirements for market risk:

Standardized duration approach (₹ in Million)

Particulars	Standalone	Consolidated
Interest Rate Risk	4,534.17	4,534.17
Foreign Exchange Risk (including gold)	4,752.38	4,752.38
Equity Risk	426.94	426.94
<b>Total</b>	<b>9,713.50</b>	<b>9,713.50</b>

(c) Capital requirements for operational risk:

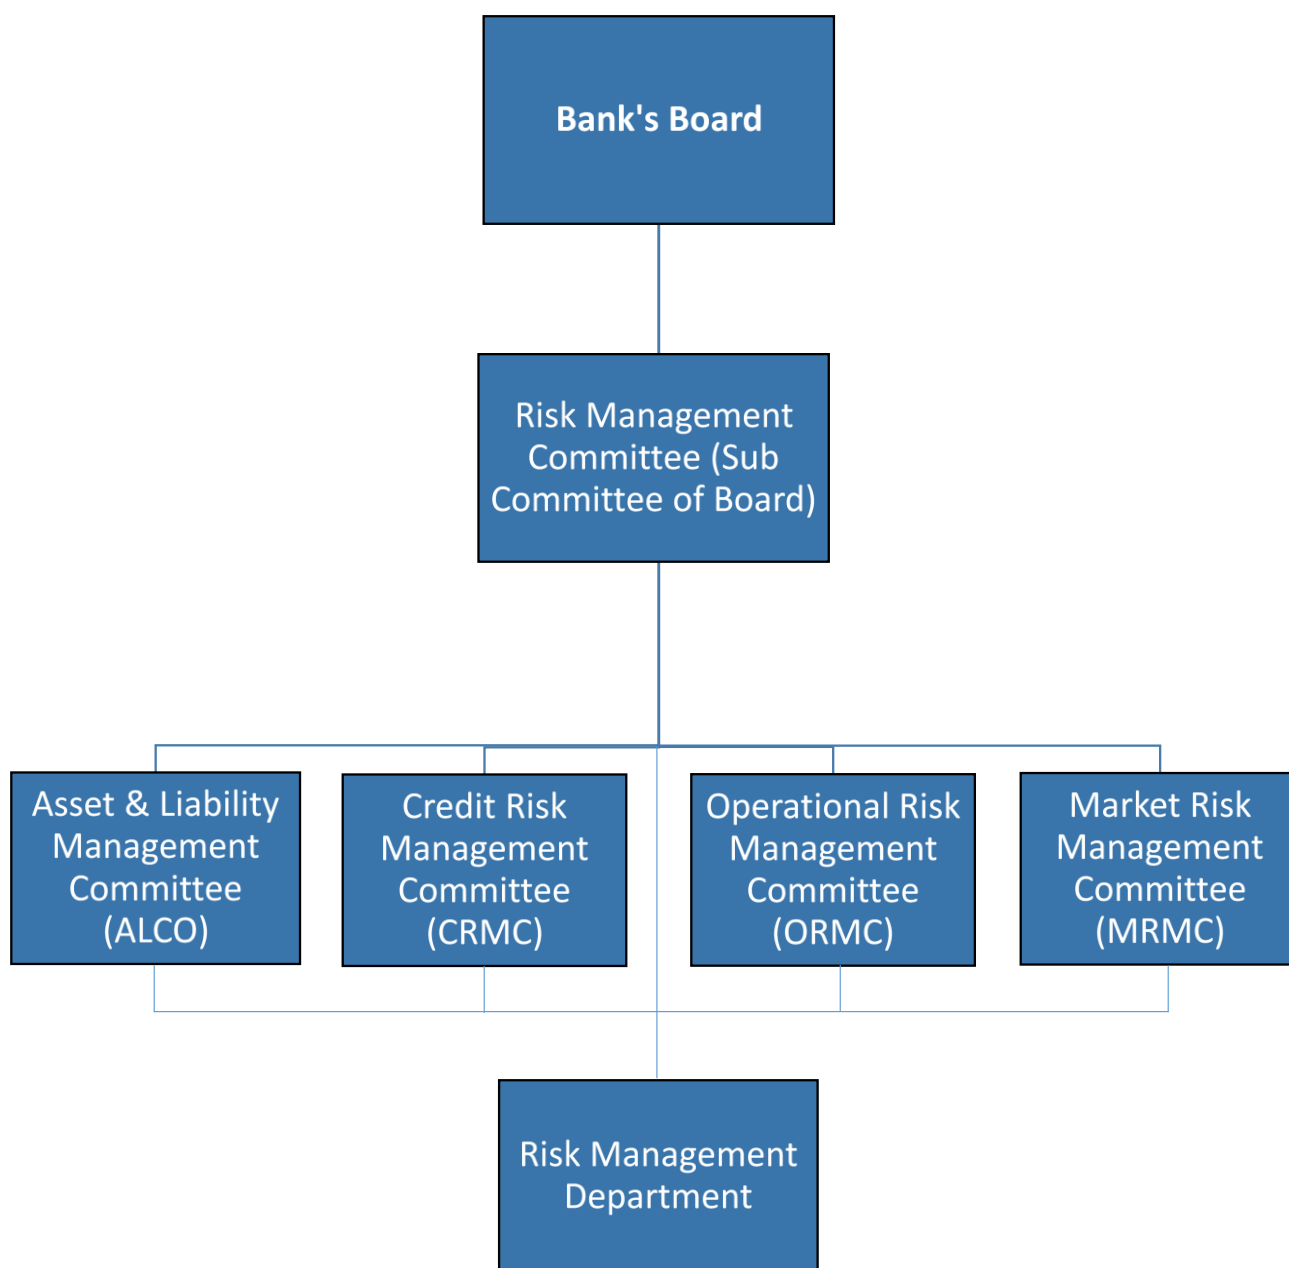

(₹ in Million)

Particulars	Standalone	Consolidated
Basic Indicator Approach	54,593.88	55,997.18

(d) Common Equity Tier 1 (CET 1), Tier 1 and Total capital ratio (as per Basel III guidelines):

Particulars	Standalone	Consolidated
Common Equity Tier 1 (CET 1)	13.51%	13.84%
Tier 1 Capital Adequacy Ratio	14.01%	14.34%
Total Capital Adequacy Ratio	16.55%	16.87%

Organisation Structure:

**Risk Management Architecture:**

Risk is an integral part of the banking business and the Bank aims to achieve an appropriate trade-off between risk and returns. To ensure sustainable and consistent growth, the Bank has developed a sound risk management framework. The Bank undertakes business activities within the defined risk appetite limits and policies approved by the Board of the Bank. The Board has also constituted a Risk Management Committee (RMC) which oversees the different type of risks.

The Bank has put in place various policies to manage the risks, viz. Integrated Risk Management Policy, Credit Risk Management Policy, Asset Liability Management Policy, Policy on Market Risk Management, Operational Risk Management Policy, Internal Capital Adequacy Assessment Process (ICAAP) Policy. All the policies are reviewed at regular intervals by Board.

The following specific committees have been constituted to facilitate focussed oversight on various risks.

- (i) Asset Liability Committee (ALCO)
- (ii) Credit Risk Management Committee (CRMC)
- (iii) Operational Risk Management Committee (ORMC)
- (iv) Market Risk Management Committee (MRMC)

These committees work within the overall guidelines and policies approved by the Board.

**Credit Risk:**

Credit risk refers to the deterioration in the credit quality of the borrower adversely impacting the financial performance of the Bank. The losses incurred by the Bank in a credit transaction could be due to inability or wilful default of the borrower in honouring the financial commitments to the Bank.

Bank has put in place Risk Management System to identify the risks at an early stage and manage them by setting and monitoring prudential limits besides taking other corrective measures.

**Limit Framework:**

In order to manage the concentration risk, limit framework has been laid down for following type of exposures:

- Single and group borrower exposure
- Sensitive sector exposure
- Unsecured exposure
- Country-wise exposure
- Internal rating wise exposure
- Term loan exposure
- Industry-wise exposure
- Interbank exposure

These exposure limits are monitored on regular basis by various apex level committees of the Board.

**Credit Review Framework:**

Bank has adopted the Credit Review Framework, which involves credit risk assessment and risk categorisation of the credit proposals into Low risk / Medium risk / High risk / No-Go based upon quantified risk scoring matrices on analysing the risk factors along with subjective risk parameters. Based on Risk Score and Risk Categorization, Risk Advisory is issued to take risk based / informed credit decision at various Credit Committees.

**Rating and Scoring Model:** All credit proposals are subject to credit risk rating / scoring process to support credit decision making as well as to enhance risk management capabilities for portfolio management, pricing and risk based capital measurement. In order to ensure robustness of the rating models, the rating models have been subjected to validation by an external agency. The Bank has entry level scoring models for all the fresh sanctions coming under structured loan products and other loans which are not subjected to Rating Model.

**Loan review mechanism:** Loan review mechanism and Credit audit system are in place for the periodical review/audit of the large value accounts and bring about qualitative improvements in credit administration of the Bank. In addition, Standard Assets Monitoring Committee reviews the Special Mention Accounts periodically to initiate timely action to prevent slippage of standard assets to non-performing assets. As a part of monitoring mechanism, accounts which are downgraded from investment category are identified and monitored closely.

### **Asset Liability Management:**

Asset Liability Management framework facilitates bank to measure, monitor and control liquidity risk and interest rate risk on its balance sheet. This helps in providing suitable strategies for asset liability management. The asset liability management framework consists of the following key components

- Liquidity risk management
- Interest rate risk management
- Balance sheet and Basel III liquidity ratios
- Stress Testing and scenario analysis
- Contingency funding plan

Bank has set in place ALM policy to achieve two primary objectives as listed below:

#### Short Term Objective:

- To optimize the Net Interest Margin (NIM) of the Bank
- To provide adequate liquidity
- To manage re-pricing risk

#### Long Term Objective:

- To maximize the shareholder's wealth

Asset Liability Management is the function of Asset Liability Committee (ALCO). It operates under the guidance and supervision of the Board and/or Sub-Committee of Board on Risk Management. It meets at regular intervals to review the interest rate scenario, review of MCLR, TBLR, EBLR (REPO), Base Rate, liquidity position, product pricing for both deposits and advances, maturity profile of the assets and liabilities, demand for Bank funds, cash flows of the Bank and overall Balance Sheet Management.

Liquidity risk is measured and monitored through two Approaches-Flow approach and Stock approach. Flow approach involves comprehensive tracking of cash flow mismatches and is done through preparation of Structural liquidity statement on a daily basis. Appropriate tolerance levels/prudential limits have been stipulated for mismatches in different time buckets. Under Stock Approach various balance sheet ratios are prescribed with appropriate limits. The compliance of ratios to the prescribed limits ensures that the Bank has managed its liquidity through appropriate diversification and kept it within the sustainable limit.

For measurement and monitoring of Interest rate risk, currency wise, both Traditional gap approach and Duration gap approaches are followed. The short-term impact of interest rate movements on NIM is worked out through "Earnings at Risk" approach taking into consideration Yield curve risk, Basis risk and Embedded Options Risk. The long-term impact of interest rate movements on Market Value of

Equity is also worked out through Duration Gap approach. The monthly interest rate sensitivity statement is reviewed by ALCO and Quarterly interest rate sensitivity is reviewed by RMC.

### **Market Risk Management:**

Market risk is the possibility of loss caused by adverse movements in the market variables. The Bank for International Settlements (BIS) defines market risk as “the risk that the value of ‘on’ or ‘off’ balance sheet positions will be adversely affected by movements in equity and interest rate markets, currency exchange rates and commodity prices”. Thus, Market Risk is the risk to the bank’s earnings and capital due to changes in the market level of interest rates or prices of securities, foreign exchange and equities, as well as the volatilities of those changes. The objective of market risk management is to assist the business units in maximizing the risk adjusted return by providing analytics driven inputs regarding market risk exposures, portfolio performance vis-à-vis risk exposures and comparable benchmarks. Following risks are managed under Market Risk.

- Interest Rate Risk
- Exchange Rate Risk
- Equity Price Risk

The market risk may also arise from changes in commodity prices and volatility. However, Bank does not have any exposure to commodity related markets.

### **Market Risk Management (MRM) Framework**

- Risk Identification:** Setting a framework for identifying, assessing and managing market risk in order to provide clarity on various dimensions of risk identification and recognition to each of the business functions.
- Risk Measurement and Limits:** Bank recognizes that no single risk statistic can reflect all aspects of market risk. Therefore, various statistical and non-statistical risk measures are used to enhance the stability of risk measurement of market risk. Together, these risk measures provide a more comprehensive view of market risk exposure than any single measure. Market risk is managed with various metrics viz. Value at Risk (VaR), Earnings at Risk (EaR), Modified duration (MD), PV01 Limits, Net Overnight Open Position Limits (NOOPL), Individual Gap Limit (IGL) and Aggregate Gap Limit (AGL) currency wise and also through sensitivity analysis. Stress testing is also conducted on a regular basis to monitor the vulnerability of the bank to extreme but plausible unfavourable shocks.
- Risk Monitoring:** Bank monitors and controls its risk, using various internal and regulatory risk limits for trading book which are set based on economic scenario, business strategy, management experience and Bank’s risk appetite. Rate scan is carried out to ensure that transactions are carried out at prevailing market rates.
- Risk Reporting:** Mid Office monitors treasury operations on day to day basis. A weekly summary note is placed to Chief Risk Officer and on monthly basis to MRMC. Stress testing is done for assessing market risk as per framework prescribed in Stress Test Policy and reported to MRMC on Quarterly basis.

Market risk management is governed by comprehensive board approved Policy on Market Risk Management and Stress Testing Policy to ensure that the risks spread across different activities carrying an underlying market risk are within the stipulated risk appetite of the bank. All the policies are benchmarked with industry-best practices and RBI regulations. The risk reporting mechanism in the Bank comprises disclosures and reporting to the various apex level committees.

### **Operational Risk:**

Operational Risk (OR) is the risk of loss resulting from inadequate or failed internal processes, people or systems, or from external events. The bank has put in place Operational Risk Management Framework (ORMF) and Operational Risk Management systems (ORMS) to ensure effective governance, risk

capture and assessment and quantification of operational risk. Operational risk is well managed by using appropriate qualitative & quantitative methods and established internal control systems in day to day management processes and adopting various risk mitigating strategies. The risk perceptions in various products / processes are critically analysed and corrective actions if required, are initiated.

Bank has implemented a web-based Operational Risk Management System to capture, measure, monitor and manage its operational risk. Bank has put in place frameworks for Risk Control Self Assessment (RCSA) and Key Risk Indicators (KRIs). Risk and control self-assessment is used to identify key operational risk and assess the degree of effectiveness of the internal controls.

Bank has been taking steps to strengthen the RCSA and KRI by reviewing and improving the coverage area for management of Operational risk.

#### **Climate Risk:**

Banks are exposed to physical risks of climate change, as they may incur severe losses caused by weather events. Furthermore, the banking industry faces risks in relation to the transition to a carbon-neutral economy, due to considerable exposures to high-emission sectors. These exposures make them vulnerable to new climate policies, rapidly advancing carbon-neutral technology and changing market conditions.

Bank is actively lending to Green Energy initiatives viz Solar/ Wind etc under wholesale lending and retail schemes for e- Vehicles have been launched. A Green portfolio consisting of exposure to companies associated with business in sectors such as Renewable Energy (Solar, Wind, and Hydro-Water), Electric Vehicle, and Ethanol etc will be created for special monitoring and progress.

Lending to high polluting (Green House Gas emission) industries needs special attention and hence Bank has implemented Risk Based Pricing takes into account the climate risk associated with such exposure. At present, disincentive in the form of Pricing Mark-up ranging from 0.25% to 1.00% (based on external, rating) is charged for Top 5 polluting sectors.

Shouldering our responsibility towards preserving environment/ climate, Bank takes a holistic approach while appraising such credit proposals, assessing the alternative processes, requirement of obtaining NOC, from Govt/ Statutory Authorities, installing environment friendly equipment etc are ensured/ stipulated for implementation. Exposures in these sectors are monitored to remain restricted to prescribed ceilings.

**Table DF-3****Credit Risk: General disclosures for all banks****Qualitative Disclosures:****(a) Credit Risk Management:**

Credit risk is defined as the possibility of losses associated with diminution in the credit quality of borrowers or counterparties.

**Architecture:**

In adherence with various guidelines and leading industry practices, the Bank has set up a robust governance structure for the management of credit risk, ensuring an adequate oversight, monitoring and reporting. The framework establishes the responsibilities of the board of directors. The Bank has established a Board level sub-committee known as 'Risk Management Committee (RMC)' constituted in terms of RBI guidance note on Risk Management system.

**Risk Management Committee (RMC):**

The RMC evaluates overall risks faced by the Bank and is responsible for the establishment of an effective system to identify measure, monitor, and control and mitigate the risk.

The Board has delegated authority to the RMC for credit risk related responsibilities. The committee oversees credit risk management and ensures that the principal credit risks facing the Bank have been properly identified and are being appropriately managed. The committee approves and periodically reviews the overall risk appetite and credit risk management strategy. The committee reviews the risk management policies, the Bank's compliance with risk management guidelines stipulated by the RBI.

The risk committee also reviews credit risk profile and any major development, internal and external, and their impact on portfolio of the bank

**Credit Risk Management Committee (CRMC):** CRMC deals with the issues relating to credit policy and procedures, and analyzes, manages and controls credit risk on a bank wide basis.

**Loan Review Management Committee (LRMC):** As a part of Credit risk management process, Loan Review Management Committee (LRMC), has been constituted to undertake review of borrowal accounts sanctioned by various Committees.

**Definitions of past due and impaired (for accounting purpose)**

Bank has adopted the definitions of the past due and impaired (for accounting purposes) as defined by RBI for Income Recognition and Asset Classification norms. Further, in line with RBI guidelines, the moratorium period, wherever granted, is factored in for the purpose of asset classification.

The policy of the bank for classifying bank's loan assets is as under:

Non Performing Asset (NPA): A non performing asset (NPA) is a loan or an advance where:

- Interest and/ or installment of principal remain overdue for a period of more than 90 days in respect of a term loan,
- The account remains 'out of order' in respect of an Overdraft/Cash Credit (OD/CC)
- The bill remains overdue for a period of more than 90 days in the case of bills purchased and discounted,
- The installment of principal or interest thereon remains overdue for two crop seasons for short duration crops
- The installment of principal or interest thereon remains overdue for one crop season for long duration crops

An OD/CC account is treated as '**out of order**' if the outstanding balance remains continuously in excess of the sanctioned limit/drawing power for 90 days. In cases where the outstanding balance in the principal operating account is less than the sanctioned limit/drawing power, but there are no credits continuously for 90 days as on the date of Balance Sheet or credits are not enough to cover the interest debited during the same period, these accounts are treated as '**out of order**'.

Non Performing Assets of the Bank is further classified in to three categories as under:

- **Sub standard Assets**

A sub standard asset is one which has remained NPA for a period less than or equal to 12 months.

- **Doubtful Assets**

An asset would be classified as doubtful if it has remained in the substandard category for 12 months.

- **Loss Assets**

A loss asset is one where loss has been identified by the bank or by internal or external auditors or the RBI inspection.

### **Credit Risk Management Policy:**

The Bank has put in place the Credit Risk Management Policy (part of Credit Policy) and the same has been ported on Bank's intranet. The main objective of the policy is to ensure that the operations are in line with the expectation of the management and the strategies of the top management are translated into meaningful directions to the operational level. The Policy stipulates prudential limits on large credit exposures, standards for loan collateral, portfolio management, loan review mechanism, risk concentrations, risk monitoring and evaluation, provisioning and regulatory / legal compliance.

The Bank identifies the risks to which it is exposed and applies suitable techniques to measure, monitor and control these risks.

While the Board / Risk Management Committee of the Board devises the policy and fixes various credit risk exposures, Credit Risk Management Committee implements these policies and strategies approved by the Board / RMC, monitors credit risks on a bank wide basis and ensures compliance of risk limits.

Bank considers rating of a borrower as an important tool to measure the credit risk associated with any borrower and accordingly implemented rating software.

b) Total gross credit risk exposures, Fund Based and Non-fund based separately.

(₹ in Million)

Particulars	Standalone	Consolidated
Gross Credit Risk Exposures		
Fund Based		
Loans and Advances	55,06,443.12	55,06,443.12
Investments	20,73,867.66	20,74,590.46
Other Assets	6,28,345.51	6,29,678.95
<b>Total Fund Based</b>	<b>82,08,656.30</b>	<b>82,10,712.54</b>
Non Fund Based including contingent credit, contracts and derivatives*	32,17,533.18	32,17,737.28
<b>Total Credit Risk Exposure</b>	<b>1,14,26,189.48</b>	<b>1,14,28,449.82</b>

\*includes notional principles of derivatives exposures, fund based unavailed limits, LC, acceptances and Guarantees

c) Geographic distribution of credit risk exposures Fund based and Non-fund based (Standalone) separately

(₹ in Million)

Geographical Region	Fund Based	Non Fund Based including contingent credit, contracts and derivatives	Total
Overseas	4,25,999.42	82,663.19	5,08,662.61
Domestic	77,82,656.88	31,34,869.99	1,09,17,526.87
<b>Total</b>	<b>82,08,656.30</b>	<b>32,17,533.18</b>	<b>1,14,26,189.48</b>

d) Industry-wise distribution of exposures (Standalone) as on 30.09.2024

(₹ in Million)

Sno	MAJOR INDUSTRIES/SECTORS	FB Exposure	NFB Exposure	Committed Exposure
1	<b>Chemicals &amp; Chemical Products</b>

**Table DF – 4****Credit Risk: disclosures for portfolios subject to the standardized approach****Qualitative Disclosures:**

(a) The Bank uses ratings assigned by the Seven Rating Agencies approved by the Reserve Bank of India namely a) CRISIL, b) ICRA, c) CARE, d) India Ratings, e) Acuite and f) Infomerics g) Brickwork for the eligible exposures according to the Basel III framework. For overseas credit exposure, bank accepts rating of Standard & Poor, Fitch, & Moody's.

The Bank uses only publically available solicited ratings assigned by the above approved credit rating agencies for all eligible exposures, both on balance sheet and off balance sheet, whether short term or long term, in the manner permitted in the RBI guidelines on Basel III capital regulations.

For assets in the Bank's portfolio that have contractual maturity up to one year, short term ratings accorded by the chosen credit rating agencies are considered relevant. For other assets, which have a contractual maturity of more than one year, long term ratings accorded by the chosen credit rating agencies are considered relevant.

Long term/short term ratings issued by the chosen domestic credit rating agencies have been mapped to the appropriate risk weights applicable as per the standardised approach under Basel III capital regulations.

**Use of multiple rating assessment:**

- If there are two ratings accorded by chosen credit rating agencies that map into different risk weights, the higher risk weight are applied
- If there are three or more ratings accorded by chosen credit rating agencies with different risk weights, the ratings corresponding to the two lowest risk weights should be referred to and the higher of those two risk weights should be applied. i.e., the second lowest risk weight

**Quantitative Disclosures:**

(b)The total credit risk exposure (Standalone) bifurcated after the credit risk mitigation under Standardized Approach is as under:

(₹ in Million)

<b>Standalone</b>	<b>Book Value</b>	<b>Risk Weighted value</b>

100% Risk weight	8,65,841.81	6,81,200.22
Above 100% Risk weight	12,91,034.57	11,87,343.48
<b>Total</b>	<b>1,14,26,189.48</b>	<b>34,05,958.13</b>

The total credit risk exposure (Consolidated) bifurcated after the credit risk mitigation under Standardized Approach is as under:

(₹ in Million)

<b>Consolidated</b>	<b>Book Value</b>	<b>Risk Weighted value</b>
Below 100% Risk weight	92,70,158.76	15,37,548.09
100% Risk weight	8,66,461.01	6,81,819.42
Above 100% Risk weight	12,91,830.05	11,92,091.81
<b>Total</b>	<b>1,14,28,449.82</b>	<b>34,11,459.32</b>

## Table DF-5 :Credit Risk Mitigation: disclosures for standardized approaches

### Qualitative Disclosures

The Bank has put in place Credit Risk Mitigation & Collateral Management Policy (part of Credit Policy) with the primary objective of a) Mitigation of credit risks & enhancing awareness on identification of appropriate collateral taking into account the spirit of Basel III / RBI guidelines and (b) Optimizing the benefit of credit risk mitigation in computation of capital charge as per approaches laid down in Basel III / RBI guidelines.

The Bank generally relies on Risk Mitigation techniques like Loan participation, Ceiling on Exposures, Escrow mechanism, Forward cover, higher margins, loan covenants, Collateral and insurance cover.

Valuation methodologies are detailed in the Credit Risk Management Policy (part of Credit Policy).

### Eligible collateral for which CRM benefit taken for Computation of Capital Charge as per RBI guidelines:

The following collaterals are recognized for availing CRM benefit for Computation of Capital Charge:

- i) Cash (as well as certificates of deposit or comparable instruments, **including fixed deposit receipts**, issued by the lending bank) on deposit with the bank, which is incurring the counterparty exposure.
- ii) Gold: Gold would include both bullion and jewellery. However, the value of the collateralized jewellery should be benchmarked to 99.99 purity.
- iii) Securities issued by Central and State Governments
- iv) Kisan Vikas Patra and National Savings Certificates provided no lock-in period is operational and if they can be encashed within the holding period
- v) Life insurance policies with a declared surrender value of an insurance company which is regulated by an insurance sector regulator
- vi) Debt securities rated at least BBB (-)/PR3/P3/F3/A3
- vii) Units of Mutual Funds

### Main types of guarantor counterparty and their creditworthiness

The Bank considers credit protection in terms of the guarantees which are direct, explicit, irrevocable and unconditional. The bank takes into account such credit protection in calculating capital requirements

Only guarantees issued by entities with a lower risk weight than the counterparty will lead to reduced capital charges, since the protected portion of the counterparty exposure is assigned the risk weight of the guarantor, whereas the uncovered portion retains the risk weight of the underlying counterparty

Credit protection given by the following entities is recognised as counterparty Guarantor:

- (i) Sovereigns (Central and State Governments)
- (ii) Sovereign entities (including ECGC, NCGTC and CGTMSE)
- (iii) Banks with a lower risk weight than the counterparty

All types of securities eligible for mitigation are easily realizable financial securities. Hence, presently no limit / ceiling has been prescribed to address the concentration risk in credit risk mitigants recognized by the Bank.

The Bank uses the comprehensive approach in capital assessment. In the comprehensive approach, when taking collateral, the Bank calculates the adjusted exposure to a counterparty for capital adequacy purposes by netting off the effects of that collateral. The Bank adjusts the value of any collateral by a haircut to take into account possible future fluctuations in the value of the security occasioned by market movements.

### Quantitative Disclosures

For each separately disclosed credit risk portfolio (Standalone/ Consolidated), the total exposure (after, where applicable, on- or off balance sheet netting) that is covered by eligible financial collateral after the application of haircuts:

(₹ in Million)

Type of Exposure	Eligible financial Collateral	Guarantees
Gross Credit Risk Exposures		
Fund Based		
Loans and Advances	9,45,556.44	4,46,440.49
Investments	0.00	0.00
Other Assets	0.00	0.00
<b>Total Fund Based</b>	<b>9,45,556.44</b>	<b>4,46,440.49</b>

## Table DF – 7

### Market risk in trading book

#### Market Risk :

Market risk is the possibility of loss caused by changes in the market variables. The Bank for International Settlements (BIS) defines market risk as “the risk that the value of ‘on’ or ‘off’ balance sheet positions will be adversely affected by movements in equity and interest rate markets, currency exchange rates and commodity prices”. Thus, Market Risk is the risk to the bank’s earnings and capital due to changes in the market level of interest rates or prices of securities, foreign exchange and equities, as well as the volatilities of those changes. The objective of market risk management is to assist the business units in maximizing the risk adjusted rate of return by providing analytics driven inputs regarding market risk exposures, portfolio performance vis-à-vis risk exposures and comparable benchmarks. Following risks are managed under Market Risk.

- Interest Rate Risk
- Exchange Rate Risk
- Equity Price Risk

The market risk may also arise from changes in commodity prices and volatility. However, Bank does not have any exposure to commodity related markets.

Market Risk Management (MRM) Framework of the bank is as follows:

- a) Risk Identification: Setting a framework for identifying, assessing and managing market risk in order to provide clarity on various dimensions of risk identification and recognition to each of the business functions.
- b) Risk Measurement and Limits: Bank recognizes that no single risk statistic can reflect all aspects of market risk. Therefore various statistical and non-statistical risk measures are used to enhance the stability of risk measurement of market risk. Market risk is managed with various metrics viz. Value at Risk (VaR), Earnings at Risk, Modified duration, PV01 Limits, Net Overnight Open Position Limits (NOOPL), Individual Gap Limit (IGL) and Aggregate Gap Limit (AGL) currency wise and also through sensitivity analysis. Stress testing is also conducted on a regular basis to monitor the vulnerability of the bank to extreme but plausible unfavourable shocks.
- c) Risk Monitoring: Bank monitors and controls its risk, using various internal and regulatory risk limits for trading book which are set based on economic scenario, business strategy, management experience and Bank’s risk appetite. Rate scan is carried out to ensure that transactions are executed and revalued at prevailing market rates.
- d) Risk Reporting: Monitoring of Treasury operations is done by Mid Office and a daily report and weekly summary report is put up to Chief Risk Officer. Capital charge on account of Market Risk is computed and reported to MRMC on monthly and Board on quarterly basis. Stress testing is done for assessing market risk by following assumptions prescribed in Stress Test Policy and reported to MRMC on Quarterly basis.

Market risk management is governed by comprehensive board approved market risk management policy, Integrated Treasury Management Policy, Stress testing and

Derivative Policy to ensure that the risks spread across different activities carrying an underlying market risk are within the stipulated risk appetite of the bank. All the policies are benchmarked with industry-best practices and RBI regulations. The risk reporting mechanism in the Bank comprises disclosures and reporting to the various apex level committees.

**Quantitative Disclosures:**

The capital requirements for:

(₹ in Million)

Particulars	Standalone	Consolidated
Interest rate risk	4,534.17	4,534.17
Foreign exchange risk	4,752.38	4,752.38
Equity position risk	426.94	426.94
<b>Total</b>	<b>9,713.50</b>	<b>9,713.50</b>

**Table DF – 8  
Operational Risk**

**Qualitative Disclosures:**

Operational risk is defined as the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events. This definition includes legal risk, but excludes strategic and reputational risk.

Operational risk is now on the focus of intense interest among industry participants, regulators and other stake holders. The bank has put in place Operational Risk Management Frame work (ORMF) and Operational Risk Management systems (ORMS) to ensure effective governance, risk identification, assessment and quantification of operational risk exposure. Operational risk is well managed by using appropriate qualitative & quantitative methods and established internal control systems in day to day management processes and adopting various risk mitigating strategies. The risk perceptions in various products / processes are critically analysed and corrective actions if required, are initiated.

Bank has implemented certain in- house applications under Operational Risk Management System to identify, measure, monitor and manage its operational risk exposure. Bank has built up internal loss data base for 8 years.

Capital charge for Operational Risk is computed as per the Basic Indicator Approach as per RBI guidelines.

**Quantitative Disclosures**

The average of the gross income, as defined in the Basel III Capital regulations, for the previous 3 years i.e. is considered for computing the capital charge. The required capital is ₹ 55,997.18 Million (Consolidated).

**Table DF – 9****Interest Rate Risk in the Banking Book (IRRBB)****Qualitative Disclosures:**

IRRBB refers to the potential adverse financial impact on the Bank's banking book from changes in interest rates.

The interest rate risk is measured and monitored through two approaches:

(i) Earning at Risk (Traditional Gap Analysis) :

The immediate impact of the changes in the interest rates on net interest income of the bank is analyzed under this approach.

(ii) Economic Value of Equity (Duration Gap Analysis):

Modified duration of assets and liabilities is computed separately to finally arrive at the modified duration of equity. This approach assesses impact on economic value of equity by assuming parallel shift in the yield curve for a given change in the yield. Impact on the Economic Value of Equity is also analyzed for a 200 bps rate shock as required by RBI. Market linked yields are used in the calculation of the Modified Duration.

The changes in market interest rates have earnings and economic value impacts on the bank's banking book. Thus, given the complexity and range of balance sheet products, IRR measurement systems are used that assess the effects of the rate changes on both earnings and economic value. Techniques followed are simple maturity (fixed rate) and repricing (floating rate) gaps and duration gaps based on current on-and-off-balance sheet positions, to a little higher technique that incorporate assumptions on behavioural pattern of assets, liabilities and off-balance sheet items and can easily capture the full range of exposures against basis risk, embedded option risk, yield curve risk, etc.

The analysis of bank's Interest Rate Risk in Banking Book (IRRBB) is done for Global position. Analysis note on the same on a monthly basis is placed to ALCO.

**Quantitative Disclosures:**

The impact on earnings and economic value based on interest rate shocks are given below:-

- i) Earnings at Risk for 25 bps interest rate shock as on for one year time horizon is (-) ₹3279.09 Million
- ii) Change in Economic Value of Equity for 200 bps interest rate shock in Banking Book is ₹44708.45 Million

**DF-10: General Disclosure for exposures related to Counterparty Credit Risk:**

Counterparty Credit Risk is the risk that the counterparty to a derivative transaction can default before the final settlement of the transaction’s cash flow. The Bank sets limits as per the norms on exposure stipulated by RBI for both fund and non fund based facilities including derivatives. Limits are set as a percentage of the capital funds and are monitored on regular basis. For corporates the derivatives limits are assessed and sanctioned in conjunction with regular credit limit as part of regular appraisal.

All the Derivative transactions with the Counterparty are evaluated as per Board approved Derivative Policy of the Bank.

The derivative exposure calculated using Current Exposure Method (CEM) and outstanding is given below:

(₹ in Million)

Derivatives	Notional Principle	Current Credit Exposure(+veMTM)	Credit Exposure
Forward Contracts	14,91,844.27	2,640.00	33,565.59
Interest Rate Swaps	11,466.00	8.34	77.17

**Extract of Basel III common disclosure template –STEP 3**

**Common Equity Tier 1 capital: instruments and reserves**

		Component of regulatory capital reported by bank	Source based on reference numbers/letters of the balance sheet under the regulatory scope of consolidation from step 2
1	Directly issued qualifying common share (and equivalent for non-joint stock companies) capital plus related stock surplus	76369.86	A1+B1
2	Retained earnings	16541.42	
3	Accumulated other comprehensive income (and other reserves)	459409.17	B2+B3+B4+B5+B7+B8(i)+B10(i)+B11+B12(i)
4	Directly issued capital subject to phase out from CET1 (only applicable to non-joint stock companies)	0.00	
5	Common share capital issued by subsidiaries and held by third parties (amount allowed in group CET1)	0.00	
6	Common Equity Tier 1 capital before regulatory adjustments	552320.45	
7	Prudential valuation adjustments	0.00	
8	Goodwill (net of related tax liability)	0.00	

**Table DF-13: Main Features of Regulatory Capital Instruments**

**Disclosure template for main features of regulatory capital instruments**

1	Issuer	Indian Bank
2	Unique identifier (e.g. CUSIP, ISIN or Bloomberg identifier for private placement)	INE562A01011
3	Governing law(s) of the instrument	Applicable Indian Laws and regulatory requirements
	<b>Regulatory treatment</b>	
4	Transitional Basel III rules	Common Equity Tier 1
5	Post-transitional Basel III rules	Eligible
6	Eligible at solo/group/ group & solo	Group & Solo
7	Instrument type	Common Shares
8	Amount recognised in regulatory capital (₹ in Million)	13469.64
9	Par value of instrument	Not Applicable
10	Accounting classification	Share holder's equity
11	Original date of issuance	various dates
12	Perpetual or dated	Perpetual

13	Original maturity date	Not Applicable
14	Issuer call subject to prior supervisory approval	Not Applicable
15	Optional call date, contingent call dates and redemption amount (₹ in Million)	Not Applicable
16	Subsequent call dates, if applicable	Not Applicable
	<i>Coupons / dividends</i>	<i>Dividend</i>
17	Fixed or floating dividend/coupon	<i>Dividend</i>
18	Coupon rate and any related index	Not Applicable
19	Existence of a dividend stopper	Not Applicable
20	Fully discretionary, partially discretionary or mandatory	Fully discretionary
21	Existence of step up or other incentive to redeem	No
22	Noncumulative or cumulative	Non-cumulative
23	Convertible or non-convertible	Not Applicable
24	If convertible, conversion trigger(s)	Not Applicable
25	If convertible, fully or partially	Not Applicable
26	If convertible, conversion rate	Not Applicable
27	If convertible, mandatory or optional conversion	Not Applicable
28	If convertible, specify instrument type convertible into	Not Applicable
29	If convertible, specify issuer of instrument it converts into	Not Applicable
30	Write-down feature	No
31	If write-down, write-down trigger(s)	Not Applicable
32	If write-down, full or partial	Not Applicable
33	If write-down, permanent or temporary	Not Applicable
34	If temporary write-down, description of write-up mechanism	Not Applicable
35	Position in subordination hierarchy in liquidation (specify instrument type immediately senior to instrument)	Not Applicable
36	Non-compliant transitioned features	No
37	If yes, specify non-compliant features	Not Applicable

**Table DF-13: Main Features of Regulatory Capital Instruments**

**Table DF-15: Disclosure Requirements for Remuneration**

-----Not applicable-----

As per RBI Master Circular on Basel III, this table is only applicable to all private sector and foreign banks operating in India.

**Table DF-16: Equities-Disclosure for Banking Book Positions**

Investments are classified at the time of purchase into Held for trade (HFT), Available for Sale (AFS) and Held to Maturity (HTM) categories in line with the RBI master circular on Prudential Norms for classification, valuation and operation of investments portfolio by Banks. Investments that are held principally for sale within a short period are classified as HFT securities. Investments that the Bank intends to hold till maturity are classified under the HTM category. Investments in the equity of subsidiaries/joint ventures are categorized as HTM in accordance with the RBI guidelines. All other investments are classified as AFS securities.

Equity investments under the HTM category are carried at acquisition cost. Equity investments under the banking book are the Bank’s investments in subsidiaries and associates. As on 30.09.2024, Book value of equity shares under Banking book is ₹ 2621.02 million.

<b>Table DF 17- Summary comparison of accounting assets vs. leverage ratio exposure measure</b>		<b>(₹ in Million)</b>
<b>Item</b>		
Total consolidated assets as per published financial Statement		81,43,800.40
Adjustment for investments in banking, financial, insurance or commercial entities that are consolidated for accounting purposes but outside the scope of regulatory consolidation		(1,150.00)
Adjustment for fiduciary assets recognised on the balance sheet pursuant to the operative accounting framework but excluded from the leverage ratio exposure measure		0.00
Adjustments for derivative financial instruments		33,642.76
Adjustment for securities financing transactions (i.e. repos and similar secured lending)		7,353.09
Adjustment for off-balance sheet items (i.e. conversion to credit equivalent amounts of off-balance sheet exposures)		4,80,227.32
Other adjustments		(39.65)
<b>Leverage ratio exposure</b>		<b>86,63,833.91</b>

<b>DF 18 – Leverage ratio common disclosure template</b>		<b>(₹ in Million)</b>
<b>On-balance sheet exposures</b>		<b>Consolidated</b>
1	On-balance sheet items (excluding derivatives and SFTs, but including collateral)	81,43,800.40
2	(Asset amounts deducted in determining Basel III Tier 1 capital)	(1,189.65)
3	Total on-balance sheet exposures (excluding derivatives and SFTs) (sum of lines 1 and 2)	81,42,610.75
<b>Derivative exposures</b>		
4	Replacement cost associated with all derivatives transactions (i.e. net of eligible cash variation margin)	2,648.34
5	Add-on amounts for PFE associated with all derivatives transactions	30,994.42
6	Gross-up for derivatives collateral provided where deducted from the balance sheet assets pursuant to the operative accounting framework	0.00
7	(Deductions of receivables assets for cash variation margin provided in derivatives transactions)	0.00
8	(Exempted CCP leg of client-cleared trade exposures)	0.00
9	Adjusted effective notional amount of written credit derivatives	0.00

DF 18 – Leverage ratio common disclosure template		(₹ in Million)
10	(Adjusted effective notional offsets and add-on deductions for written credit derivatives)	0.00
11	Total derivative exposures (sum of lines 4 to 10)	33,642.76
<b>Securities financing transaction exposures</b>		
12	Gross SFT assets (with no recognition of netting), after adjusting for sale accounting transactions	0.00
13	(Netted amounts of cash payables and cash receivables of gross SFT assets)	0.00
14	CCR exposure for SFT assets	7,353.09
15	Agent transaction exposures	0.00
16	Total securities financing transaction exposures (sum of lines 12 to 15)	7,353.09
<b>Other off-balance sheet exposures</b>		
17	Off-balance sheet exposure at gross notional amount	15,57,156.74
18	(Adjustments for conversion to credit equivalent amounts)	(10,76,929.42)
19	Off-balance sheet items (sum of lines 17 and 18)	4,80,227.32
<b>Capital and total exposures</b>		
20	Tier 1 capital	5,71,130.81
21	Total exposures (sum of lines 3, 11, 16 and 19)	86,63,833.91
<b>Leverage ratio</b>		
22	<b>Basel III leverage ratio</b>	<b>6.59%</b>
